SUMMARY

I am a passionate and experienced software engineer specializing in web development. I have expertise in languages such as PHP, HTML, CSS, and REACT, and I've had the opportunity to work with various frameworks like REACT and Codeigniter. In my projects, I actively utilize version control systems like git and Github to optimize workflow. In terms of education, I am pursuing a bachelor's degree in software engineering while also being an associate's degree student in computer programming. With my passion and skills, I am committed to bringing a unique perspective to every project.

For more information, you can visit my website or check out my LinkedIn profile.
